

## Features

- Input voltage: 1.5V~8V
- Output range: 1.2V~5.0V
- Maximum output current: 400mA @ VOUT=3.3V
- PSRR: 60dB @1KHz
- Dropout voltage: 180mV @ IOUT=100mA
- Quiescent current: 0.5μA Typ.
- Shut-down current: <1μA
- Recommend capacitor: 1μF
- Built-in Short-Circuit Protection, Current Limiter

## Applications

- Radio control systems
- Cellphones, radiophone, digital cameras
- Bluetooth, wireless handsets
- Others portable consumer equipments

## General Description

The PT FGÍ is a high accuracy, low noise, high speed CMOS Linear regulator with low power consumption and low dropout voltage, which provide large output currents even when the difference of the input-output voltage is small. The devices offer a new level of cost effective performance in cellular phones, laptop and notebook computers, and other portable

devices.

The current limiter's fold-back circuit also operates as a short circuit protection and an output current limiter at the output pin.

The PT FGÍ regulators are available in standard SOT23-3, SOT23-5 and DFN1\*1-4 packages. Standard products are Pb-free and Halogen-free.

## Selection Table

| Part No.       | Package  | Temperature | Tape & Reel |
|----------------|----------|-------------|-------------|
| J O 3457BXXMR  | SOT23-3  | -40 ~ +85°C | 3000/REEL   |
| J O 3457BXXM5R | SOT23-5  | -40 ~ +85°C | 3000/REEL   |
| J O 3457BXXDR  | DFN1*1-4 | -40 ~ +85°C | 10000/REEL  |

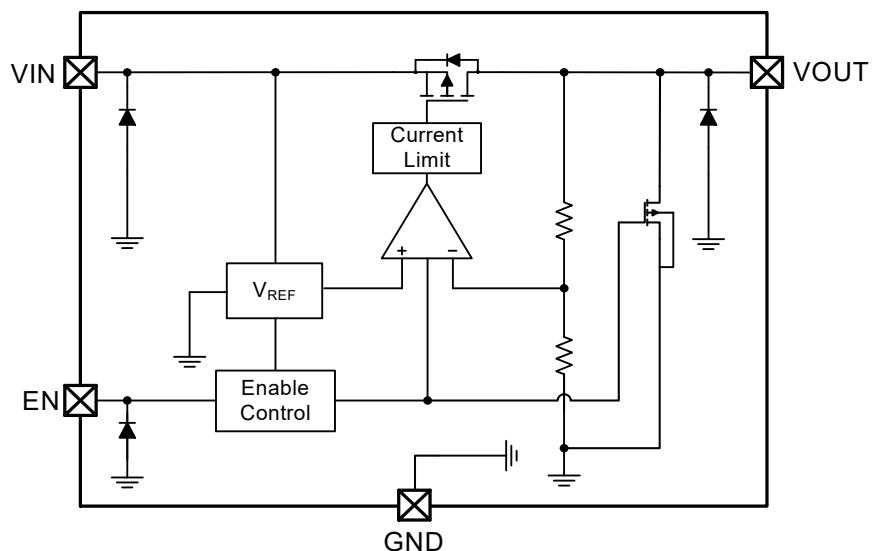

Note: XX indicates 1.2V~5.0V by 0.1V step. For example, 28 means product outputs 2.8V

## Order Information

PT FGÍ ①②③④⑤

| Designator | Symbol  | Description              |
|------------|---------|--------------------------|
| ①②         | Integer | Output Voltage(1.2~5.0V) |
| ③④         | M       | Package: SOT23-3         |
|            | M5      | Package: SOT23-5         |
|            | D       | Package: DFN1*1-4        |
| ⑤          | R       | RoHS / Pb Free           |
|            | G       | Halogen Free             |

## Pin Assignment

SOT23-3 (Top View)

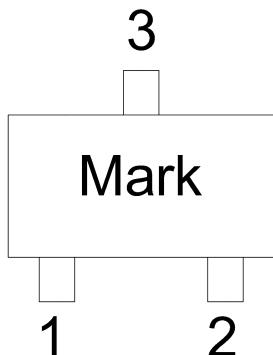

Table1: PT FGÍ BXXMR series (SOT23-3 PKG)

| PIN NO. | PIN NAME | FUNCTION           |
|---------|----------|--------------------|
| 1       | GND      | GND pin            |
| 2       | VOUT     | Output voltage pin |
| 3       | VIN      | Input voltage pin  |

SOT23-5 (Top View)

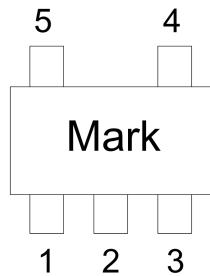

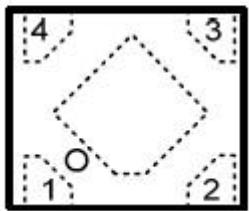

Table2: HM1235BXXM5R series (SOT23-5 PKG)

| PIN NO | PIN NAME | FUNCTION                          |
|--------|----------|-----------------------------------|
| 1      | VIN      | Input                             |
| 2      | GND      | Ground                            |
| 3      | EN       | Enable(Active high, not floating) |
| 4      | NC       | Not connected                     |
| 5      | VOUT     | Output                            |

## DFN1X1-4

Table3

: HM1235BXXDR series (DFN1\*1-4PKG)

| PIN NO | PIN NAME | FUNCTION                          |
|--------|----------|-----------------------------------|
| 1      | VOUT     | Output                            |
| 2      | GND      | Ground                            |
| 3      | EN       | Enable(Active high, not floating) |
| 4      | VIN      | Input                             |

## Absolute Maximum Ratings

|                             |               |   |                |
|-----------------------------|---------------|---|----------------|
| Input Voltage.....          | -0.3V to 9V   | Storage Temperature .....               | -55°C to 150°C |
| Output Current.....         | 450mA         | Package Lead Soldering Temperature..... | 260°C          |
| Operating Temperature ..... | -40°C to 85°C | Junction Temperature.....               | -40°C to 125°C |

Note: These are stress ratings only. Stresses exceeding the range specified under "Absolute Maximum Ratings" may cause substantial damage to the device. Functional operation of this device at other conditions beyond those listed in the specification is not implied and prolonged exposure to extreme conditions may affect device reliability.

## Thermal Information

| Symbol        | Parameter   | Package  | Max. | Unit |
|---------------|---|----------|------|------|
| $\theta_{JA}$ | Thermal Resistance (Junction to Ambient)<br>(Assume no ambient airflow, no heat sink) | SOT23-3  | 500  | °C/W |
|               |   | SOT23-5  | 500  |      |
|               |   | DFN1*1-4 | 500  |      |
| $P_D$         | Power Dissipation   | SOT23-3  | 0.40 | W    |
|               |   | SOT23-5  | 0.40 |      |
|               |   | DFN1*1-4 | 0.40 |      |

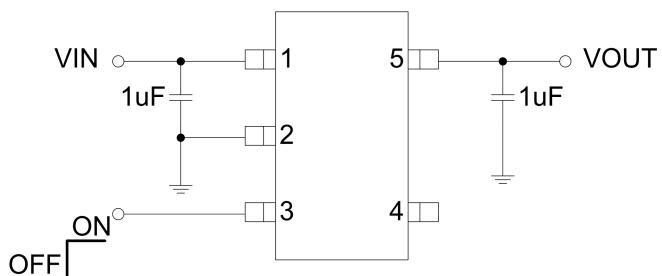

Note:  $P_D$  is measured at  $T_a = 25^\circ\text{C}$

## Electrical Characteristics

The following specifications apply for  $V_{OUT}=3.3\text{V}$ ,  $T_A=25^\circ\text{C}$ , unless specified otherwise

| SYMBOL            | ITEMS                       | CONDITIONS   | MIN | TYP       | MAX      | UNIT          |

## Application Information

In general, all the capacitors need to be low leakage. Any leakage the capacitors have will reduce efficiency, increase the quiescent current.

A recent trend in the design of portable devices has been to use ceramic capacitors to filter DC-DC converter inputs. Ceramic capacitors are often chosen because of their small size, low equivalent series resistance (ESR) and high RMS current capability. Also, recently, designers have been looking to ceramic capacitors due to shortages of tantalum capacitors.

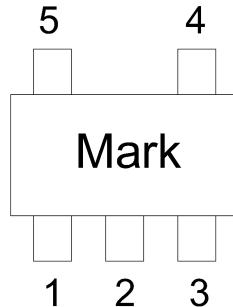

Unfortunately, using ceramic capacitors for input filtering can cause problems. Applying a voltage step to a ceramic capacitor causes a large current surge that stores energy in the inductance of the power leads. A large voltage

spike is created when the stored energy is transferred from these inductance into the ceramic capacitor. These voltage spikes can easily be twice the amplitude of the input voltage step.

Many types of capacitors can be used for input bypassing, however, caution must be exercised when using multi layer ceramic capacitors (MLCC). Because of the self-resonant be generated under some start-up conditions, such as connecting the LDO input to a live power source.

The LDO also requires an output capacitor for loop stability. Connect a 1uF tantalum capacitor from OUT to GND close to the pins. For improved transient response, this output capacitor may be ceramic.

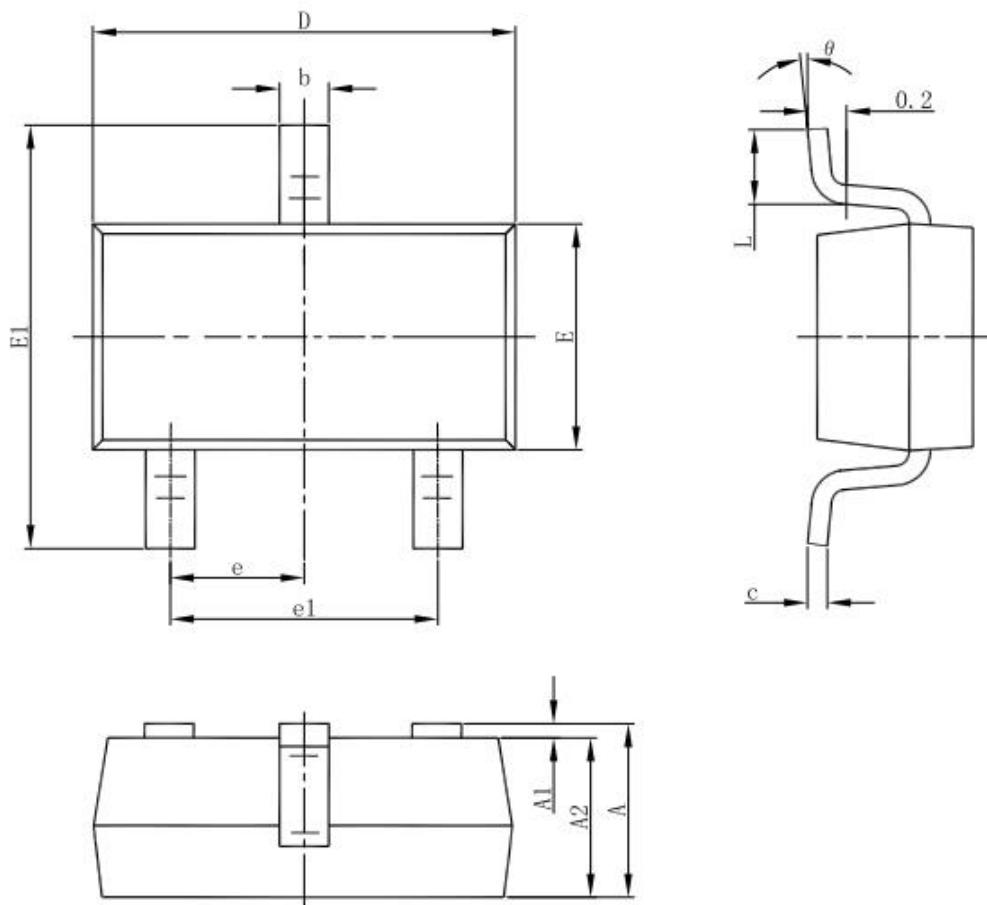

### Marking Description
